

equiv - Partitioning

pair wise testing

Card color	Card Type	Top Color	Top type	Result
Red	Num(5)	Red	Num(3)	Valid
Blue	Num(5)	Blue	Num(3)	Valid
Green	Num(5)	Green	Num(3)	Valid
Yellow	Num(5)	Yellow	Num(3)	Valid

Note: original number of test cases for a regular card of type(T) and of color (C) and number(N) played on top of of the same card type(T) and color (C) is equal to $(9 \times 4) = 36$ which was reduced to only (4) test cases.

Boundary - Value
